

WHAT IS BPMN?

WHAT IS BPMN?

- Business Process Modelling Notation

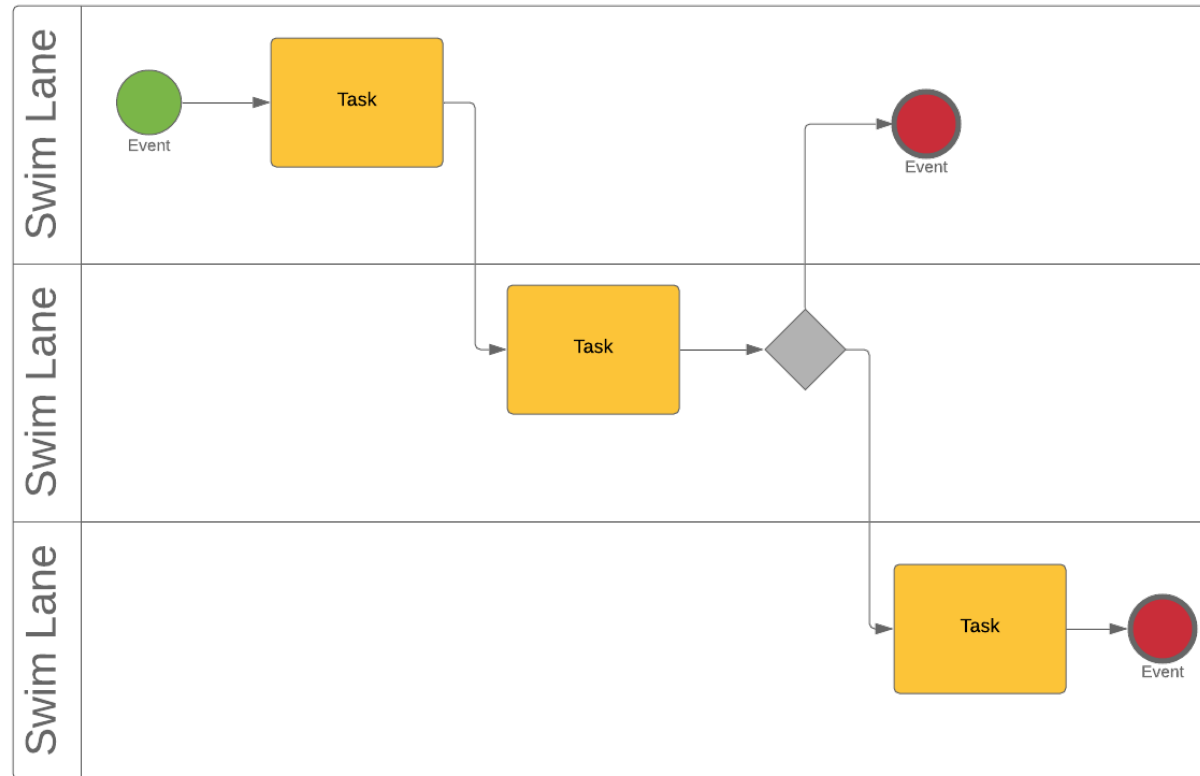

THE OPEN MANAGEMENT GROUP

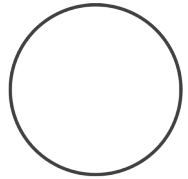

- BPMN 2.0 is an OMG standard

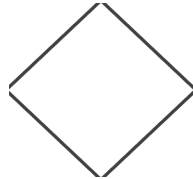

BPMN & FLOWCHARTS

BASIC VOCABULARY

Event

Gateway

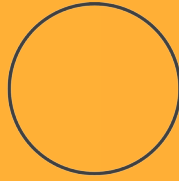

Activity

Sequence Flow

EVENT

- An event is something that happens during the course of a process.
- These events affect the flow of the model and usually have a cause (trigger) or an impact (result).
- Events are circles with open centers to allow internal markers to differentiate different triggers of results

ACTIVITY

- An activity is a generic term for work that a company performs in a process.
- The types of activities that are a part of a Process Model are: Sub-Processes and Task, which are rounded rectangles

- A gateway is used to control the divergence and convergence of Sequence Flows in a Process and in a Choreography.
- It will thus determine branching, forking, merging, and joining of paths

SEQUENCE FLOW

- A Sequence Flow is used to show the order that Activities will be performed in a Process and in a Choreography
